

c. the lid further comprising a removable lid access member providing access to the hollow lid cavity, wherein the removable lid access member is replaceable in the decorative lid.

Please add new claims 26-33.

¹⁶~~26~~. (New) The decorative container system of claim ¹~~15~~, wherein the inner container is at least partially transparent.

¹²~~27~~. (New) A decorative container system for displaying items in a hollow region comprising:

a decorative container comprising an upper opening and an inner container positioned within an outer container thereby defining the hollow region therebetween, wherein the outer container is at least partially transparent;

a removable and replaceable member allowing access to the hollow region; and

a decorative lid shaped to be removably and replaceably mounted in the upper opening of the decorative container, the decorative lid defining a hollow lid cavity and being at least partially transparent, the lid further comprising a removable lid access member providing access to the hollow lid cavity.

¹³~~28~~. (New) The decorative container system of claim ¹²~~27~~, wherein the removable lid access member is replaceable in the decorative lid.

¹⁴~~29~~. (New) The decorative container system of claim ¹²~~27~~ wherein the decorative lid further comprises a base portion and a shell that cooperates with the base portion to define the hollow lid cavity, wherein the base portion defines a lid access opening that provides access to the hollow lid cavity, wherein the removable lid access member is mounted in the lid access opening.

¹⁵~~30~~. (New) The decorative container system of claim ¹⁴~~29~~, wherein the transparent shell is dome shaped.

¹⁶

~~31~~

(New) The decorative container system of claim ¹⁴~~29~~, wherein the distance between the shell and the base portion is at least about two centimeters at the point of greatest separation within the hollow lid cavity.

¹⁷

~~32~~

(New) The decorative container system of claim ¹²~~27~~, further comprising a plurality of dividers extending radially from the inner container to the outer container in the hollow region, the dividers being spaced about the hollow region defining a plurality of hollow cavities within the hollow region.

¹⁸

~~33~~

(New) The decorative container system of claim ¹²~~27~~, wherein the inner container is at least partially transparent.
